engineering

New!

MD-755

Remote Control Interface

Motion Detector

When it comes to video loops, chances are your message won't reach the right person at the right time. Why gamble when you can have your content spring to life the moment they walk by? The MD-755 uses state of the art sensor technology to strategically deliver the message when it matters most. Talk about customer awareness! Learn more about this and other accessories at www.marchettieng.com
